

Testimonials

- “A revolutionary tool that should be on every truck.” - Distribution Manager
- “Fantastic tool, it reduces down-time and is easy to use.” - Water Treatment Plant Operator
- “The Valve-Out Tool made this job smooth as butter.” - Distribution and Metering Superintendent
- “It normally takes us 8 hours to do this job for one valve. We did a second partially open valve that afternoon. The Valve-Out Tool is a major labor saver for us.” - Field Operations Superintendent.
- “I don’t know how a water or sewer utility can be without this tool. It’s a major improvement to the old way of doing things. Our employees are safer and more productive.” - Director of Utilities.
- “Our entire utility can use the Valve-Out Tool. We can also it on check valves, butterfly valves, gasket replacements, meters you name it.” - Lift Station Superintendent
- “With increased safety for our workers, portability, and reduced personnel and equipment costs, the Valve-Out Tool has paid for itself many times over in the short time since we have made the investment.” - Water Utilities Operations Superintendent

SMP Water Service Kit - Extra Spacer Bars Available for Wider Valves

Titan Flange Alignment Pins

Piper Backup Wrench

Valve-Out Water Service Kit

- Flange Spreading, Flange Alignment, and Backup Wrenches available for 2” through 12” 150 Series flanges. (Larger sizes available upon request)
- Titan flange alignment pins are the fastest safest and easiest way to line up flanged bolts. Simply insert and turn pins into any 2 bolt holes. Once the holes are completely aligned the Titan FAT's can be slipped out with fingers. NO hammering required.
- The Piper backup wrenches eliminate the need to use 2 wrenches to tighten nuts. The Piper functions like a second pair of hands.

VOC Spreading Plates and Spacer Bars Box

VOC 1 Pins Box (8) each 3/4”, 7/8” & 1”

SMP Valve-Out Tool Saved Multiple Hours Changing this 10” 150 Gate Valve

“The last time we did this type of work, we prepped the day before and it still took us 8 hours. With the Valve-Out Tool we finished in 2.5 hours, including an hour to drain the water level. What a labor saver!

- Plant Supervisor 35 years experience.

SMP Valve-Out Tool Works Great in the Vertical Position Too
